III. MEDICAL & PSYCHOLOGICAL PROFILE

- Spinal Injury:** Cervical and Lumbar radiculopathy; ongoing pain management. MRI scheduled to confirm herniation.
- Facial Trauma:** Severe lacerations from side-window shattering. ER sutures applied. Permanent scarring likely.
- Passenger:** Soft tissue injuries; currently in conservative care.

CRITICAL CASE EVENT: THE 14-DAY MIA GAP

Between 04/01/26 and 04/15/26, John Doe went MIA. Aggressive Casualty immediately issued a \$15,000 "Take-it-or-leave-it" offer citing a gap in treatment. **Legal Strategy:** We successfully argued the gap was due to "Depressive Withdrawal" from facial disfigurement. Litigation was initiated to force re-evaluation.

IV. CURRENT STATUS

The case has transitioned to a **Pre-Litigation/Discovery** footing. We are currently coordinating with Local Farm Mutual for subrogation against Apex Delivery Services to recover the client's \$1,000 deductible while pressuring Aggressive Casualty for a six-figure BI settlement based on permanent scarring.
