

DATE: 03/30/2026 (Visit #13)

S: "Left leg feels like it's burning. Sleep is interrupted." Pain 7/10.

O: Noted recurrence of muscle guarding in the lumbar paravertebrals. Left Achilles reflex remains sluggish (1+). Significant restriction in lateral flexion.

A: Patient experiencing a post-traumatic flare-up. Conservative management yields only temporary relief. Structural disc involvement continues to impede progress.

P: CMT Cervical/Lumbar. Myofascial release. Instructed in home ice protocol.

DATE: 04/02/2026 (Visit #14)

S: "Numbness in toes is constant today." Pain 6/10.

O: Positive Valsalva maneuver (reproducing radicular pain). Lumbar ROM remains -50% of expected baseline.

A: Neurological symptoms are worsening despite high-frequency adjustments. Patient is reaching the limits of chiropractic efficacy for this specific disc morphology.

P: Last adjustment before mandatory 14-day "rest" phase requested by patient due to mental exhaustion. Referral to neurosurgery for ESI/Surgical consult finalized.
