

CLIENT INTAKE SUPPLEMENT

PRIOR INJURY HISTORY (PRE-EXISTING)

Prior Neck/Back Issues: Yes - 2018 Lumbar Strain

Description: Minor lifting injury at work. Resolved with 4 weeks of PT. No MRI performed in 2018.

Other Medical History: Chronic Migraines (Diagnosed 2021).

Legal Implication: Aggressive Casualty will attempt to "apportion" the current spinal injury to the 2018 incident. We must argue the "Aggravation of a Pre-existing Condition" to maximize the current claim value, as John was asymptomatic for 7 years prior to the current MVA.

PRIOR LEGAL REPRESENTATION (CURRENT CLAIM)

Previous Attorney: "The Fast Settlement Firm" - Atty. Barry Slow

Reason for Termination: Lack of communication and pressure to accept \$15k offer.

Attorney Lien Status: **PENDING** - Previous firm claiming \$1,200 in costs + Quantum Meruit.

CASE STRATEGY: THE "EGGSHELL PLAINTIFF" NARRATIVE

Strategy Update: While the 2018 injury is a hurdle, the current facial scarring and spinal trauma are objectively new. We will position John as an *Eggshell Plaintiff*—his spine was vulnerable due to 2018, making this impact more devastating than it would be for a healthy person.
