

EMERGENCY MEDICAL CONDITION (EMC) ATTESTATION

Pursuant to Florida Statute §627.736 (or applicable state PIP/No-Fault laws)

Patient: John Doe | **Evaluating Physician:** Dr. Sarah Spine, MD

I have evaluated John Doe regarding injuries sustained on 02/14/2026. Based on clinical findings, objective imaging (MRI/EMG), and the violent mechanism of injury (mechanical extrication), it is my professional medical opinion that the patient **did suffer an Emergency Medical Condition (EMC)**.

RATIONALE:

- **Acute Symptoms:** Significant neurological deficit (radiculopathy) and severe facial trauma.
- **Risk:** Absence of immediate medical attention would have reasonably been expected to result in serious jeopardy to the patient's health and/or serious dysfunction of a bodily organ or part (Spinal Nerve Root/Cosmetic Integrity).

Conclusion: Patient meets the criteria for full PIP benefit exhaustion and high-severity trauma classification.

Sarah Spine, MD
